V49 AIR

AERODYNAMIC INNOVATION: THE V49 AIR TOP CASE REVOLUTION

In the world of motorcycles, aerodynamics play a crucial role in comfort and performance. The **V49 AIR** has been created to set new standards in this area, combining technology, functionality and advanced design.

The result of hard work from GIVI's Research and Development Department, the V49 AIR introduces the **patented WINGFLOW system**, developed through meticulous **wind-tunnel testing**.

This innovation significantly reduces vibrations, turbulence and noise, improving the overall stability of the vehicle and riding comfort even at high speeds.

The **four aerodynamic fins at the sides** optimize air flow and limit the air swirls generated by the top case, helping to keep the behavior of the motorcycle smoother and more balanced.

The Monokey® fixing system and 49-litre capacity mean it can hold two of GIVI's modular helmets ECE 22.06 in XL size, offering maximum spaciousness with minimum encumbrance. The lid, with its red or transparent aesthetic insert and **photoengraved logo**, enhances the lines with a distinctive, modern touch.

The V49 AIR represents a new showcase for GIVI's research: advanced aerodynamic performances, solid construction and contemporary style, all in service of travelers.

M10

PLATE WITH ANTI-VIBRATION SYSTEM

The M10 Monokey® plate is the result of a painstaking design study aimed at ensuring robustness, efficiency and durability over time.

Made from **fibreglass-reinforced technopolymer**, it offers an excellent compromise between mechanical resistance and lightness.

The anodized aluminum covers and photoengraving elevate its design, demonstrating the care and quality of its construction.

The M10 boasts an advanced **anti-vibration system** with shock absorbers under the seals and a SILENT BLOCK dedicated to securing the bolt, which **reduce noise and vibrations** to prolong the lifespan of the components and improve riding comfort.

Technical specifications:

- Main body in fibreglass-reinforced technopolymer
- Cover in anodized aluminum with a satin finish
- PU seals highly resistant against wear
- Aluminum bolt and plugs for greater stability
- Set up for use with light kit
- Visual indicator to check the wear on the seals
- Anti-theft security with screws protected under a cover

M10	
M10	MONOKEY® M10 plate, made of reinforced plastic with the addition of anodised aluminium lids. It is characterised by the presence of dampens vibrations system composed by springs positioned under the seals and an additional SILENT BLOCK system placed under the bolt

ALP44 ALPINA

ALPINA: THE FIRST ALUMINIUM MONOLOCK TOP CASE

Alpina is the new Monolock range top case **made of aluminium**, with a **material thickness of 1.2 mm** to ensure greater lightness at a lower price.

The **Crablock closing system**, combined with the star shaped dial on the bottom, means the case can be released from the plate through a quick, controlled step.

It can only be removed while the lid is open, guaranteeing a high level of security and preventing any accidental release.

The new design involves eliminating the strap passages from the bottom of the top case and adding **an internal lining** on the base, in red felt with a document pocket, to effectively protect the contents from impacts and scratches.

NEW **B38 BERNINA**

**BERNINA:
NEW MONOLOCK TOPCASE**

Bernina is the new **Monolock®** case designed for those seeking style, resistance and practicality in a single product. Made from highly resistant technopolymer with an aluminium insert, it combines solidity and sophisticated aesthetics, adapting perfectly to both motorcycles and scooters.

The design of the reinforced corners creates a more modern, dynamic line while maintaining structural strength and rigidity. Inside, the **felt lining**, supplied as standard, effectively protects contents against impacts and scratches, while the capacity is enough to **hold a modular GIVI helmet ECE 22.06 in size XXL**.

The Bernina, which comes complete with a fixing kit and plate, stands out for the ease of its assembly and the quality of its technical solutions.

The **Crablock closing system**, combined with the star shaped dial on the bottom, means the case can be released from the plate through a quick, controlled step.

It can only be removed while the lid is open, guaranteeing a high level of security and preventing any accidental release.

The Bernina is the perfect fusion of up-to-date design, solidity and functionality, making it an accessory just right for those who wish to make every journey both stylish and secure.

S120 - USB and USB-C POWER SOCKET

POWER SOCKET FOR HANDLEBAR

Compatible with tubular handlebars: 8 - 35 mm diameter

- Input: 12-24 V
- USB Output: 5V-3.4 A 9V-2A 12V-1.5A
- USB-C Output: 5V-3A 9V-3A 12V-2.5A

S120

S120

USB and USB-C power socket for handlebar, including wiring harness with fuse for direct motorcycle battery connection

S204 - BIKE COVER

S204 - BIKE COVER

GIVI's motorcycle cover for inside is made from a **high-quality stretch fabric**, designed to guarantee protection and a perfect fit across a wide range of models.

The elasticity of the material means it can adapt to the shape of the vehicle, making it ideal for maxi scooters, sports motorcycles and powerful tourers, even when carrying side cases or top cases.

The fabric offers protection against dust and scratches, keeping the motorcycle clean and sheltered at all times.

It is easy to fold up and put away, takes up little space and is enhanced by a reflective GIVI print on the side, a mark of its identity and quality.

Ample measurements guarantee total coverage, even when it comes to models like the BMW GS 1300 Adventure fitted out with a trio of GIVI aluminium cases.

NEW **S502 - BATTERY-OPERATED AIR COMPRESSOR**

RECHARGEABLE BATTERY-POWERED INFLATOR

The S502 battery-operated air compressor from GIVI is a practical, versatile device.

With a USB-C port for recharging, it can also be used as a 600 lumen emergency torch or a power bank to charge mobile devices.

The 5,200 mAh battery guarantees autonomy and steady power (charging current of 6 A, Max. 5 V/2 A).

The kit includes a USB-C cable, a USB – USB-C adaptor, a standard American valve and adaptors for balls, inflatable accessories and tyres with a French valve.

S502

26055 - COUNTER DISPLAY

Cardboard counter display, to hold up to 5 S502 battery-powered compressors.

Dimensions: 22B x 14P x 35H

NEW **TC400B - NECK SAFER**

NECK SAFER

The NECK SAFER is the perfect neck warmer for those seeking comfort and protection.

The waterproof nylon exterior guarantees an effective barrier against wind and rain, while the soft felt fabric on the inside is wonderfully warm and soft to the touch.

The velcro fastening system makes the neck warmer easy to wear and adjust, guaranteeing a stable, comfortable fit even while riding and with gloves on.

Compact and lightweight, the NECK SAFER is easy to fold up and tuck away in any bag or pocket. Perfect for everyday or tourism use.

TC400B	
TC400B	Neck safer with exterior waterproof nylon material, and soft felt fabric on the inside

**CANYON ADVENTURE BAGS:
MAXIMUM RESISTANCE AND IMPERMEABILITY**

GIVI's range of **waterproof Canyon bags** is expanding, completing the offer with the addition of 3 new models: one contoured side bag with the Monokey Cam-Side fixing system, designed for enduro motorcycles with a high exhaust on the right-hand side; one rucksack; and one enduro waist bag, both of the latter configured for use with a **HydraPak water bag**.

Canyon bags have been designed to best satisfy the needs of off-road travel, guaranteeing **excellent resistance against UV rays, impacts and abrasion** under even the most extreme conditions.

GRT727 MONOKEY® CAM-SIDE

Contoured side bag , 25 ltr

KIT SMART SECURITY LOCK
to be purchased separately

Materials:

- Cordura Nylon
- Hypalon
- High-tenacity 1680D/PU coating
- Ripstop Nylon TPU
- Highly UV-resistant external material (ref. ISO 4892 – 2)
- Materials made in accordance with the REACH standard

Features:

- Removable and waterproof sand-coloured inner bag with high-frequency heat-sealing, resistant to heavy rain and extreme conditions
- Modular load expansion system: featuring loops for the M.O.L.L.E. system located on the side, for the attachment of small additional accessories
- Removable front flap complete with a sturdy mesh pocket at the back
- Removable plastic shapers inside, to keep the bottom and sides of the bag stiff
- Fastening buckles on top, with an integrated extra-lock system to increase security
- Loops provided for the attachment of a steel cable which can be padlocked for security
- Eight load-compression points
- Ergonomic handle for carrying
- Print with reflective motifs for greater visibility

EASY-T

NEW EASY-T RANGE

The Easy-T range of motorcycle bags has been completely updated with a brand-new design, including new models suitable for all types of use, from urban settings to general tourism.

The materials and technical solutions, which are geared towards maximum efficiency, give this range a level of reliability appreciated by all lovers of two-wheeled vehicles.

The new range consists of: six tank bags, two saddle bags, two leg bags, two pairs of side bags and one left- and right-hand side bag, sold separately, two rucksacks and one tunnel bag.

Materials:

- 600D Ripstop Polyester
- PU-laminated polyester and reflective PU
- Highly UV-resistant external material (ref. ISO 4892 – 2)
- Materials made in accordance with the REACH standard

FITTING KIT |

STEALTH - NEW RETRACTABLE HOLDER

SIDE HOLDER FOR SOFT BAGS

The new Stealth fixing system is an innovative solution for the attachment of soft side bags, developed to combine technology, practicality and design. Made from **fibreglass-reinforced technopolymer and anodized aluminium insert**, it offers solidity and resistance over time, with minimal aesthetic impact on the motorcycle.

The retractable design of the frame means the original lines of the vehicle can be preserved whenever the bags are not mounted. **Installation is quick and intuitive:** simply press the release button on the right-hand side and lower the support bracket. Bags are attached with a click, immediately holding them securely in place.

The Stealth frame is particularly recommended for naked bikes and sports motorcycles. It is **compatible with the EASY12 side bag**, available in versions for the right- and left-hand sides, already set up for securing to the **specific STL_ frame for each model**.

With Stealth, GIVI is introducing a new kind of functionality, for impeccable performances while keeping the lines of the motorcycle clean.

COMPATIBLE WITH MULTIPLE MOTORCYCLE MODELS.

T526

T526

Waterproof inner bag 30 ltr. for contoured Trekker Outback Evo 33 and 40 ltr.

SLB101 - LOCK KIT WITH BMW KEY CODABLE CYLINDER,

This new system allows Outback Evo aluminum cases and Canyon Monokey Cam-Side side bags (models GRT725 and GRT727) **to be configured so they can be used directly with the motorcycle's original BMW ignition key**, eliminating the need for a separate set of keys.

The rider simply needs to purchase one or more copies of the coded lock kit specific to their BMW (each kit contains a single lock cylinder) and will then be able to easily open, close, and release all GIVI cases and bags using only the motorcycle's ignition key.

SLB101

Compatible with "SMART SECURITY LOCK" products (OUTBACK EVO SSL, GRT725, GRT727)

SLB101

Lock kit with a codable cylinder for BMW keys, allowing the use of the BMW motorcycle ignition key to configure Outback Evo SSL cases and Canyon Monokey Cam-Side bags GRT725 and GRT727.

HLP5146ST - Front headlight protection transparent

SPECIFIC FOR BMW

Designed specifically for the BMW R 1300 GS and BMW R 1300 GS Adventure, this protection stands out for its distinctive "X" shape, designed to blend seamlessly with the bike's lines, making it almost invisible.

How is it installed?

The upper section fits under the radar, also aided by an adhesive foam pad, while the lower mounting is secured with a single screw.

HLP5146ST

HLP5146ST

Front headlight protection transparent

HLP2174ST - Front headlight protection transparent

SPECIFIC FOR YAMAHA

The version developed for the **Yamaha Ténéré 700** installs directly onto the original windscreen or the larger GIVI windscreen, using the four existing screws.

The shaped design echoes the form of a shield and does not interfere with the upper engine guard at the front.
